

PWM-ISO-ex

Compact megohmmeter for safe areas & hazardous Ex-areas

compact high-impedance testing device for insulating resistances and bleeder resistors in potentially explosive atmospheres.

- Safe and universal between 1 k Ω and 2 T Ω
- Test voltage 32, 100, 500 V for ISO 1Ex
- Indication of external voltage and integrated voltage indication up to 500 V
- Push button for rapid discharge of capacities
